Carburettor: Remove the air cleaner and carburettor from the engine. Open the carburettor (including the venturies), immerse it in new brake fluid and ...

Journalism -- the Fourth Estate -- has established itself as an integral part of our society. Happenings in India during the British Raj and post-independence are the best testimony of it. Editing is the most significant part of journalism. It plays a significant role in determining the quality of a newspaper or magazine. The purpose of the book is to describe the job of editors and list skills that make them successful. It will assist all those who are in the profession or are thinking of joining it or have entered it with high ambitions. Practicing journalists aiming to move upwards will also benefit from having a point of reference and a source of idea. The book will be extremely useful for students of media and journalism. The book will help journalists to perform their job better equipped and ensure that they commit fewer mistakes. They would learn the art and science of effective editing and would not find the language of their colleague alien. They will understand the way things have been done in the past and also learn the newer ways of doing editing. The art of editing falls into two categories: journalistic skills to do the job; and editing skills that make the unintelligible readable. In the past, most of us learnt it through a painful process of trial and error. We don't want the new comers to suffer from that pain and therefore this book Communication Skills: Effective Editing.

This book presents theories and case studies for corporations in developed nations, including Japan, for designing strategies to maximize opportunities and minimize threats in business expansion into developing nations. The case studies featured here focus on Asia, including China and India, and use examples of Japanese manufacturers. Five case studies are provided, including Hitachi Construction Machinery and Shiseido in China and Maruti Suzuki in India. These cases facilitate the reader□s understanding of the business environments in emerging economies. This volume is especially recommended for business people responsible for international business development, particularly in China and India. In addition, the book serves as a useful resource for students in graduate-level courses in international management.

An extraordinary and rare insight into how a few determined entrepreneurs created an icon... - C. K. PrahaladThe targets were stupendous and considered unachievable by almost everyone. Slightly over two years to find a suitable partner, finalize all legal documentation, get governmental approval to these agreements as well as to the investment proposals, build a factory, develop a supplier base to meet localization regulations, create a sales and service network, and develop and launch a peoples car that would sell 100,000 a year, in a sector where Indian expertise was limited. And to do this as a public sector company, having to follow all governmental systems and procedures, and having to please both its masters in the government and Suzuki Motor Corporation. However, the Maruti project succeeded, and in ways that were unimaginable in 1983. The car revolutionized the industry and put a country on wheels. Suddenly, ordinary middle-class men and women could aspire to own a reliable, economical and modern car, and the steep sales targets were easily met. Twenty-six years later, the company, now free of government controls and facing competition from the worlds major manufacturers who have entered the Indian market, still leads the way. Not only that, cars made by Maruti can be seen in all continents. By any yardstick, it is an incredible story, involving grit, management skill and entrepreneurship of a high order. R.C. Bhargava, who was at the helm of thecompany, and is currently its chairman, co-writing with senior journalist and author Seetha, shows how it was done in this riveting account of a landmark achievement.
