A practical course in the fundamentals of machinery diagnostics for anyone who works with rotating machinery, from operator to manager, from design engineer to machinery diagnostician. This comprehensive book thoroughly explains and demystifies important concepts needed for effective machinery malfunction diagnosis: (A) Vibration fundamentals: vibration, phase, and vibration vectors. (B) Data plots: timebase, average shaft centerline, polar, Bode, APHT, spectrum, trend XY, and the orbit. (C) Rotor dynamics: the rotor model, dynamic stiffness, modes of vibration, anisotropic (asymmetric) stiffness, stability analysis, torsional and axial vibration, and basic balancing. Modern root locus methods (pioneered by Walter R. Evans) are used throughout this book. (D) Malfunctions: unbalance,

rotor bow, high radial loads, misalignment, rub and looseness, fluid-induced instability, and shaft cracks. Hundreds of full-color illustrations explain key concepts, and several detailed case studies show how these concepts were used to solve real machinery problems. A comprehensive glossary of diagnostic terms is included.

Today almost everyone in the developed world spends time online and anyone involved in strategic communication must think digitally. The magnitude of change may be up for debate but the trend is unstoppable, dramatically reconfiguring business models, organisational structures and even the practice of democracy. Strategic Communication, Social Media and Democracy provides a wholly new

framework for understanding this reality, a reality that is transforming the way both practitioners and theoreticians navigate this fast-moving environment. Firmly rooted in empirical research, and resisting the lure of over-optimistic communication dreams, it explores both the potential that social media offers for changing the relationships between organisations and stakeholders, and critically analyses what has been achieved so far. This innovative text will be of great interest to researchers, educators and advanced students in strategic communications, public relations, corporate communication, new media, social media and communication management.

Many important advances in technology have been associated with nanotechnology and the miniaturization of components, devices and systems. Microjoining has been closely associated with the evolution of microelectronic packaging, but actually covers a much broader area, and is essential for manufacturing many electronic, precision and medical products. Part one reviews the basics of microjoining, including solid-state bonding and fusion microwelding. Part two covers microjoining and nanojoining processes, such as bonding mechanisms and metallurgy, process development and optimization, thermal stresses and distortion, positioning and fixturing, sensing, and numerical modelling. Part three discusses microjoining of materials

such as plastics, ceramics, metals and advanced materials such as shape memory alloys and nanomaterials. The book also discusses applications of microjoining such as joining superconductors, the manufacture of medical devices and the sealing of solid oxide fuel cells. This book provides a comprehensive overview of the fundamental aspects of microjoining processes and techniques. It is a valuable reference for production engineers, designers and researchers using or studying microjoining technologies in such industries as microelectronics and biomedical engineering. Last year, author Lysa TerKeurst released the book *Made to Crave*, providing the Biblical answer to why people diet, regain the weight they lose, and continue to find themselves stuck in this vicious cycle. *Made to Crave* helped thousands of people finally achieve victory in their weight loss journey. But, according to TerKeurst, “ We need more than 19 chapters to stay motivated and on track. That ’ s why I wrote this daily devotional with 60 inspirational entries. There is plenty of new material not in the original book. Rest assured, I also included your favorite nuggets of wisdom from *Made to Crave*. ” Just like the *Made to Crave* book, this *Made to*

Crave Devotional is not a how-to get healthy book. It is the road to finding the lasting ‘ want to ’ that extends far beyond the surface issues of weighing less and wanting to wear a smaller clothes size. Says TerKeurst: “ There ’ s a spiritual battle going on. It ’ s real. And it ’ s amazing how perfectly the Bible gives us specific ways to find victory with our food struggles. “ Even for girls who don ’ t crave carrots. “

Who says a vamp can't have it all? Darcy Newhart thought it was a stroke of genius—the first–ever reality TV show where mortals vie with vampires for the title of The Sexiest Man on Earth. As the show's director, Darcy's career would be on track again. And she can finally have a life apart from

the vampire harem. Okay, so she's still technically dead, but two out of three's not bad. Now she just has to make sure that a mortal doesn't win. If only she wasn't so distracted by a super-sexy and live contestant named Austin... But Darcy doesn't know the worst of it. Austin Erickson is actually a vampire slayer! And he's got his eye on the show's leggy blond director. Only problem is, he's never wanted any woman—living or dead—as badly. But if he wins her heart, will he lose his soul? And if it means an eternity of hot, passionate loving with Darcy, does that really matter anyway?

However, the academic literature on the development of securities markets and reform of state enterprises in China is still in its infancy and fragmented. This handbook aims to bridge that gap by presenting a wide spectrum of research in the forefront of financial applications. It integrates theory and practice with state-of-the-art statistical techniques and provides numerous insights into the main challenges confronting Chinese markets in the new millennium.
