A general introduction to the area of theoretical linguistics known as cognitive linguistics, this textbook provides up-to-date coverage of all areas of the field, including recent developments within cognitive semantics (such as Primary Metaphor Theory, Conceptual Blending Theory, and Principled Polysemy), and cognitive approaches to grammar (such as Radical Construction Grammar and Embodied Construction Grammar). The authors offer clear, critical evaluations of competing formal approaches within theoretical linguistics. For example, cognitive linguistics is compared to Generative Grammar and Relevance Theory. In the selection of material and in the presentations, the authors have aimed for a balanced perspective. Part II, Cognitive Semantics, and Part III, Cognitive Approaches to Grammar, have been created to be read independently. The authors have kept in mind that different instructors and readers will need to use the book in different ways tailored to their own goals. The coverage is suitable for a number of courses. While all topics are presented in terms accessible to both undergraduate and graduate students of linguistics, cognitive linguistics, psycholinguistics, cognitive science, and modern languages, this work is sufficiently comprehensive and detailed to serve as a reference work for scholars who wish to gain a better understanding of cognitive linguistics.

Originally published in 1991, although written in the 1970s when the New Orthodoxy was exerting its most powerful influence upon students of the period, this book examines what changed and what did not change in Germany as a result of the Revolution of 1918. It discusses in particular, aspects of German life which the Social Democrats had singled out for change, and specifically political, land, and educational reform and the liberalization of the cultural and artistic climate.

The Volkswagen Transporter is one of the best-loved and most recognisable motor vehicles of all time. The preferred transport for surfers and hippies everywhere, the Volkswagen Type 2 'bus' was born in 1950, and became the first of a new breed of vehicle, the ancestor of today's people carrier. Available in various versions, including panel van, pick up and minibus, Transporters were often converted into campervans for a newly motorised class of holidaymaker. This book looks at the development, production and use of the class first, and second, generation Transporter. With archive illustrations including many colour photographs from old brochures this book is also a great evocation of the 1950s and 60s.
