Learn the most effective way to neutralize an opponent using ancient samurai techniques applied to modern combat with this illustrated martial arts guide. Modern Hand to Hand Combat: Ancient Samurai Techniques on the Battlefield and in the Street recognizes the lawless nature of today's battlefield. Hakim Isler, a veteran of the Iraq War, knows from his own experiences that in an urban combat setting, the players, the equipment, and the stakes are very different from those found in an MMA octagon, the boxing ring, or the martial arts dojo. Based primarily on samurai techniques over a millennium old, Isler’s system—Battlefield Proximity Combat—is an effective answer to the unique needs of the modern warfighter and military martial artist. This martial arts training book gives step-by-step self-defense instructions on how to effectively and realistically respond to life and death hand-to-hand combat situations through movements and principles that are as valid today as they were 1000 years ago. With almost three hundred illustrations and a detailed DVD, the philosophy and instructions in Modern Hand to Hand Combat can mean the difference between life and death on the battlefield or in a street fight.

This is not a book about techniques. Black Belt Hall of Famer and Tier One tactical instructor, Ernest Emerson opens the doors to the previously hidden Strategies, Tactics, and Mentality of the world’s deadliest warriors, giving you the tools to upgrade your training in any system, into a truly effective program of combat ready skills.Emerson’s genius is in being able to break down human conflict (combat) into its most basic component parts and then explain them in terms that make perfect sense. Then in turn, he gives you the ability to train and supercharge those components individually so that when they are reassembled the result is an Abrams tank powered by jet engines.But again, you must be cautioned, if you’re looking for a book on how to block a punch, you won’t find it here. This is about giving you the means to create a supercharged capability to take what you already know to the elite level, ready for actual combat.The difference between tier one operators and the rest of us is not that they know more techniques or possess secret skills. They know the same things as we do. They just know how to do them much better. Emerson takes you into his classroom to teach you the real secrets, the forbidden knowledge of the warrior elite, America’s Special Operations and Black Ops Units.The problem with training for real-world hand-to-hand combat skills is that almost all martial arts are over 200 years removed from actual combat and have been softened up or “sporterized” to be palatable to the general public. The difference between conventional training and combatives training is defined by two simple words; intent and intensity. Each needs the other to be maximally effective and conventional martial arts lack both. Without truly knowing if something will actually work in live combat, how can an instructor teach combat skills to someone whose life may depend on those skills?If you are ever in a situation where you’re face-to-face with pure evil, one who is hellbent on your destruction, and you’re not both physically and mentally prepared for violent, deadly combat, then that is the day you will likely die. The author shows that you must be able to bring violence of action against the bad guy to such a degree that it doesn’t just counter his attack, but destroys him, for attempting to do you harm.You will learn how to evaluate your current training against the criteria of the perfect technique, to judge everything you do as to whether it will work in real combat or not, and avoid wasting your valuable time doing things that are of no value.Learning and applying principles and concepts outlined in this book will give you the confidence you need, to never again wonder "Will this really work or Can I do this? You will learn that the true mastery of fighting skills is not just based on confidence in the techniques but ultimately in the confidence you have in yourself. Some of the subjects covered in detail include;1. The principles, strategies, and tactics of combat2. The physical, physiological, and psychological effects of combat on the human body and how to use them to your advantage3. The 3 Laws of Combat and the 6 Instinctual Triggers4. The high art of preemptive self-defense5. The importance of being able to distinguish between capability and capacityCombative fighting skills is not a martial art. It is hard, intense, painful training along with the development of the Warrior Mindset, which is really more valuable than any other skill you possess. Without that mindset and the iron will to win, you are only using half of your power. The other half is in the mind. You will learn how important it is to never neglect one for the other.Ernest Emerson has worked with members of the Naval Special Warfare Community, Navy SEALs for over 25 years. He carried a DOD top secret clearance for 15 years. He is the owner of Emerson Knives, Inc. and the Black Shamrock Combat Academy in Los Angeles California.

Gordon E. Perrigard was a Canadian medical doctor who combined his knowledge of advanced ju-jitsu with his knowledge of human anatomy to come up with this devastatingly effective close-in combat system.Arwrology is derived from the old Welsh word 'arwr', meaning an all-out hand-to-hand fighter. Arwrology was originally released in 1943 for use in training combatants for World War II. Martial artists from all over the world

quickly hailed its superior fighting methods, and today it remains one of the most highly sought after-and most valuable-fighting manuals in the world.Arwrology is distinctive because it uses a single system of conditioned re?exes based on general body movement for both armed and unarmed fighting. If one method fails to subdue an attacker, a practitioner can effortlessly ?ow to another technique without exposing his body to attack.Through clear instructions, photos, and illustrations Arwrology shows you how to: Defeat someone armed with a firearm, knife, dagger or clubUse knowledge to overcome brute strengthFall without injury and rise up without using your handsGet out of strangleholds, grips, and other holdsTrain to develop fast re?exes and important fighting muscle

This book, by the man who taught them, shows how the British Commandos fought in the Second World War in unarmed hand-to hand combat. It shows how they won their fights - even against enemies who were bigger, stronger, and armed. Brute strength is not required. This book shows you how to put a thug out of action with your bare hands, so fast he won't know what's hit him. Get Tough is filled with clear, graphic line drawings which, with the easy-to-follow directions, demonstrate the Fairbairn System. The author, Major W. E. Fairbairn, was a tough Police officer who spent 30 years with the Shanghai Municipal Police, where he learned ju-jitsu (Judo), Chinese boxing and other martial arts. He was senior instructor to British Special Forces during the war, and was the co-inventor of the legendary Sykes-Fairbairn Commando knife. While in China he became the first foreigner, living outside Japan, ever admitted to Kodokan Jiu-Jutsu University in Tokyo where he was awarded the black belt, second degree. Combining all the knowledge thus acquired he developed a system that stopped the Shanghai terrorists in their tracks, demoralized the Nazis, and probably proved a decisive factor in the success of Allied Special forces in World War Two. This is a must book for the armed forces, civilian defense groups, police, security guards, and indeed anyone whose life may be threatened.The method of hand-to-hand fighting described in this book is the approved standard instruction for all members of His Majesty's forces. The Commandos, and parachute troops, harrying the invasion coasts of Europe, have been thoroughlytrained in its use. Britain's two-million Home Guard are daily being instructed in its simple but terrible effectiveness. The units of the United States Marine Corps who were stationed in China between 1927 and 1940 learned these methods at my own hands when I was Assistant Commissioner of the Shanghai Municipal Police.There will be some who will be shocked by the methods advocated here. To them I say "In war you cannot afford the luxury of squeamishness. Either you kill or capture, or you will be captured or killed. We've got to be tough to win, and we've got to be ruthless - tougher and more ruthless than our enemies."
