Traditionally, the study of internal combustion engines operation has focused on the steady-state performance. However, the daily driving

related to unsteady
conditions. In fact, only a
very small portion of a

associated with slow
acceleration rate, hence
poor driveability, and
overshoot in particulate,
gaseous and noise emissions.
Despite the relatively large
number of published papers,

Nowhere in the world has the process of investment treaty arbitration been more volatile or unpredictable than in Latin America.

Although the rush of
