A Rumi story turned into a fun, illustrated allegory for kids. The 13th century Sufi mystic, Islamic scholar, Persian poet and storyteller Rumi remains a towering cultural force, and

Online Library Persian Piano Anoushirvan Rohani Deleh

possibly the most widely read poet in the world--especially on the subject of love. Here a simple tale about a donkey keeper staying at an inn becomes a parable for life lessons of joy and sorrow that will be universally understood by children in this adaptation by the Rumi scholar Omid Arabian, illustrated with great humor and authenticity by the Iranian-born artist Shilla Shakoori. *The Donkey's Gone* is based on a story from *The Masnavi*, which is an epic compilation of Rumi's wisdom in the form of poems and short stories. Adapted for children, it retains Rumi's wit and insight while also relating a cautionary tale about what we stand to lose when we imitate others and conform.

For Iran the years since Ayatollah Khomeini's death have been dominated by the need for political consolidation and economic reconstruction. The book assesses the critical dilemmas of the regime both previous to and since the demise of its first spiritual leader. The vital issues of political succession and constitutional reform are addressed, contributing to an analysis of the structures and politics of power. How these have reflected upon economic policy is considered with close attention being given to the reform policies of Rafsanjani. Foreign policy and security issues are discussed in both regional and global terms and include a study of Iranian defence strategy and its controversial re-armament drive. The final chapter examines the direction and context of all of these major policy areas, providing an analysis of whether the Islamic Republic truly represents a revolutionary alternative for the Third World or whether in fact it has developed in time to fall within a similar mould to other notable revolutions, casting by the wayside any uniquely Islamic agenda and alternatives. At the heart of this study is the belief that the Islamic regime has, since the cease-fire with Iraq, but more specifically since Ayatollah

Khomeini's death passed into a new stage of development, referred to in the book as the 'Second Republic'.

The award-winning author of *The Making of the Atomic Bomb* describes the lesser-known technological talents of actress Hedy Lamarr and the collaborative work with avant-garde composer George Antheil that eventually led to the development of spread-spectrum radio, cell phones and GPS systems. (This book was previously listed in *Forecast*.)

In a detailed sequel to Marius Deeb's authoritative *Syria's Terrorist War on Lebanon and the Peace Process*, he demonstrates how the coalition of Syria, Iran, and Hezbollah has used assassination, terrorism, and force against the peaceful and liberal democratic Cedar Revolution, trying to undermine its success in pushing the Syrian Army out of Lebanon and in winning the parliamentary elections of 2005 and 2009.

Organized by The Andy Warhol Museum Farhad Moshiri: *Go West* exhibition catalogue includes essays by contemporary art history scholars, Mitra M. Abbaspour and Shiva Balaghi, and an interview with the artist by Jose Diaz. The 120-page volume is richly illustrated with full-color illustrations of the pieces in the exhibition as well as documentary photographs of the artist at work.

Clinical psychologist and author of *The Defining Decade*, Meg Jay takes us into the world of the supernormal: those who soar to unexpected heights after childhood adversity. Whether it is the loss of a parent to death or divorce; bullying; alcoholism or drug abuse in the home; mental

Online Library Persian Piano Anoushirvan Rohani Deleh

illness in a parent or a sibling; neglect; emotional, physical or sexual abuse; having a parent in jail; or growing up alongside domestic violence, nearly 75% of us experience adversity by the age of 20. But these experiences are often kept secret, as are our courageous battles to overcome them. Drawing on nearly two decades of work with clients and students, Jay tells the tale of ordinary people made extraordinary by these all-too-common experiences, everyday superheroes who have made a life out of dodging bullets and leaping over obstacles, even as they hide in plain sight as doctors, artists, entrepreneurs, lawyers, parents, activists, teachers, students and readers. She gives a voice to the supernormals among us as they reveal not only "How do they do it?" but also "How does it feel?" These powerful stories, and those of public figures from Andre Agassi to Jay Z, will show supernormals they are not alone but are, in fact, in good company. Marvelously researched and compassionately written, this exceptional book narrates the continuing saga that is resilience as it challenges us to consider whether -- and how -- the good wins out in the end.

Making a Machine That Sees Like Us explains why and how our visual perceptions can provide us with an accurate representation of the external world. Along the way, it tells the story of a machine (a computational model) built by the authors that solves the computationally difficult problem of seeing the way humans do. This accomplishment required a radical paradigm shift - one that challenged preconceptions about visual perception and tested the limits of human behavior-modeling for practical application. The text balances scientific sophistication and compelling storytelling, making it accessible to both technical and general readers. Online demonstrations and references to

Online Library Persian Piano Anoushirvan Rohani Deleh

the authors' previously published papers detail how the machine was developed and what drove the ideas needed to make it work. The authors contextualize their new theory of shape perception by highlighting criticisms and opposing theories, offering readers a fascinating account not only of their revolutionary results, but of the scientific process that guided the way.

Ada ' s Legacy illustrates the depth and diversity of writers, thinkers, and makers who have been inspired by Ada Lovelace, the English mathematician and writer. The volume, which commemorates the bicentennial of Ada ' s birth in December 1815, celebrates Lovelace ' s many achievements as well as the impact of her life and work, which reverberated widely since the late nineteenth century. In the 21st century we have seen a resurgence in Lovelace scholarship, thanks to the growth of interdisciplinary thinking and the expanding influence of women in science, technology, engineering and mathematics. Ada ' s Legacy is a unique contribution to this scholarship, thanks to its combination of papers on Ada ' s collaboration with Charles Babbage, Ada ' s position in the Victorian and Steampunk literary genres, Ada ' s representation in and inspiration of contemporary art and comics, and Ada ' s continued relevance in discussions around gender and technology in the digital age. With the 200th anniversary of Ada Lovelace ' s birth on December 10, 2015, we believe that the timing is perfect to publish this collection of papers. Because of its broad focus on subjects that reach far beyond the life and work of Ada herself, Ada ' s Legacy will appeal to readers who are curious about Ada ' s enduring importance in computing and the wider world.

Revolutions have shaped world politics for the last three hundred years. This volume shows why revolutions occur, how they unfold, and where they created democracies and dictatorships. Jack A. Goldstone presents the history of revolutions from America and France to the collapse of the Soviet Union, 'People Power' revolutions, and the Arab revolts.
