~~Online Anatomy &
Physiology~~

Reflexology is a systematic practice in which applying some pressure to any particular points on the feet and hands give impacts on the health of related parts of the body. 1 Each point of the pressure acts as the sensors on the feet and hands

Get Free Reflexology

and is links with different parts of body specifically. 1
These sensors will be stimulated by applying the reflexology technique in order to improve the blood and energy circulation, give sense of relaxation, and maintain the homoeostasis. 2 ...

Reflexology uses
many techniques to
manipulate reflex
zones found in the
feet, of which

Get Free Reflexology

correspond to a specific body part. The zones have been mapped and this enables the Reflexologist to treat the whole body via these reflex zones on the feet. The treatment is primarily used for the stimulation of all bodily systems and aiding relaxation.
