" A good read for anyone who wants to understand what actually determines whether a developing economy will succeed " (Bill Gates, " Top 5 Books of the Year "). An Economist Best Book of the Year from a reporter who has spent two decades in the region, and who The Financial Times said " should be named chief myth-buster for Asian business. " In How Asia Works, Joe Studwell distills his extensive research into the economies of nine countries—Japan, South Korea, Taiwan, Indonesia, Malaysia, Thailand, the Philippines, Vietnam, and China—into an accessible, readable narrative that debunks Western misconceptions, shows what really happened in Asia and why, and for once makes clear why some countries have boomed while others have languished. Studwell ' s in-depth analysis focuses on three main areas: land policy, manufacturing, and finance. Land reform has been essential to the success of Asian economies, giving a kick-start to development by utilizing a large workforce and providing capital for growth. With manufacturing, industrial development alone is not sufficient, Studwell argues. Instead, countries need " export discipline, " a government that forces companies to compete on the global scale. And in finance, effective regulation is essential for fostering, and sustaining growth. To explore all of these subjects, Studwell journeys far and wide, drawing on fascinating examples from a Philippine sugar baron ' s stifling of reform to the explosive growth at a Korean steel mill. " Provocative . . . How Asia Works is a striking and enlightening book . . . A lively mix of scholarship, reporting and polemic. " —The Economist

Gendering Classicism explores the intersection of feminism, historical fiction, and modernism through the work of six writers, all of whom wrote historical novels set in ancient Greece or Rome: Naomi Mitchison, Mary Butts, Laura Riding, Phyllis Bentley, Bryher, and Mary Renault. As women gained access to higher education in the late nineteenth century, they gained access also to the classical learning that had for so long demarcated and legitimated the British ruling classes. Steeped in misogyny, the classical tradition presented educated women with a massive project: the recasting of that tradition in terms that acknowledged the existence of women - as historical agents and interpreters of the historical past.
