operations. The emergence of new technologies such as money sharing and transactional applications have revolutionized the way we do business. Wholeheartedly adopted by both the business world and consumers, mobile commerce has taken its seat at the head of the mobile app economy. Securing Transactions and Payment Systems for M-Commerce seeks to present, analyze, and illustrate the challenges and rewards of developing and producing mobile commerce applications. It will also review the integral role M-commerce plays in global business. As consumers' perceptions are taken into account, the

As magnetic stripe cards are being replaced by chip cards that offer consumers and business greater protection against fraud, a new standard for this technology is being introduced by Europay, MasterCard and Visa (EMV). This volume presents a comprehensive overview of the EMV chip solution and

# Online Library Secure Payment Solutions

explains how this technology provides a chip migration path, where interoperability plays a central role in the business model. The work offers an understanding of the security problems associated with magnetic stripe cards, and presents the business case for chip migration. Moreover, it explains the implementation of multi-application selection mechanisms in EMV chip cards and terminals, and shows you how to design a multi-application EMV chip card layout.

The challenges of payment transactions in electronic commerce were initially

underestimated, as is now clear in the light of advances in e-commerce, traditional business models are increasingly coming up against their limits. Secure, user-friendly and low-priced innovative payment solutions are urgently required to boost internationally oriented e-commerce. Value-creating market players - from payment system providers, service providers, network operators and producers of terminals to financial institutions - pin great hopes on the rapid progress with new payment systems. In the medium term, mobile phone-based payment systems will be an even more valuable
