War highlights the role of culture in military organizations and as such acts as a spotlight by which this phenomenon can be assessed seperately and then in comparison in order to demonstrate the

Campaign, Lawrence Freedman provides a detailed and authoritative account of one of the most extraordinary periods in recent British political history and a vivid portrayal of a government at war. After the shock of the Argentine invasion of the Falklands in April 1982, Margaret Thatcher faced the crisis that came to

define her premiership as she determined to recover the islands. Freedman covers all aspects of the campaign - economic and diplomatic as well as military - and demonstrates the extent of the gamble that the government took. There are important accounts of the tensions in relations with the United States, concerns among the

military commanders about the risks they were expected to take, the problems of dealing with the media and the attempts to reach a negotiated settlement. This definitive account describes in dramatic detail events such as the sinking of the Belgrano, the battle of Goose Green and the final push to Stanley. Special attention

is also paid to the aftermath of the war, including the various enquiries, and the eventual restoration of diplomatic relations with Argentina.

When Argentinian forces invaded the

Falklands in April 1982, the British government responded by despatching a task force to the Atlantic to wrest back control of the islands. The resulting war saw modern weapon systems tested in combat for the first time, to tragic effect. In the aftermath, official documents were released, but many were heavily censored,

and others withheld altogether, so that a full understanding of those events could not be gained. Drawing from recently declassified and previously unpublished reports from the official inquiry, Dr Paul Brown details the true story behind the dramatic events that led to the loss of six British ships – HMS Antelope, Ardent,

controversial sinking of the Argentinian
